

Pansies at Their Best

PITZONKA'S CUT-FLOWER MIXTURE • Developed from the Famous Swiss Giant Pansies

Enormous Flowers, Rare Colors, in this Pitzonka's Cut-Flower Mixture **SOLD EXCLUSIVELY BY PITZONKA**

This mixture, developed from the famous Swiss Giant Pansies, lends itself well to both cutting and bedding purposes. The blooms are enormous, with rich, rare colors possible only through continual breeding.

It may be difficult to imagine, but the flowers are 3 to 4 inches in diameter, with stiff, sturdy stems. A good description of them would be to think of pieces of the finest velvet. Yes, velvet is fine—and that is the texture of the petals. The foliage is vigorous in growth, of a deep forest-green color.

Again this year, as last, we can say that this is the best mixture that money can buy. Get this world-famous mixture of superb colors and treat yourself to the best. Available only from Pitzonka's.

Regular size plants, \$4.50 per 100, \$35.00 per 1000. Large size plants, \$3.50 for 50, \$6.00 per 100, \$47.00 per 1000. 250 plants or more of one size at the 1000 rate.

PITZONKA'S

Super Giant Mixture

An Exclusive Blend of Size and Color

As usual, Super Giant Pansies by Pitzonka are one of our best mixtures. Top size flowers combined with a lovely rainbow of color blendings are the great features of Super Giants of 1955-56. Purples, all the way through the yellows, including the exotic reds, make up the colors.

Many of the blooms are pencil striped, while others are dark blotched to form interesting face designs as seen in the photographs on this page. The gigantic

flowers that are borne on the sturdy stems make Super Giants ideal for arrangement work.

Mr. Pitzonka likes his Super Giant Mixture and believes you will too when you see the gorgeous colors and the gigantic flowers that you will pick. Reserve a place in your flower border or evergreen planting for the flowers with all the desirable characters—Pitzonka's Super Giant Mixture.

Regular size plants, \$3.75 per 100, \$28.50 per 1000

Large size plants, \$3.00 for 50, \$5.00 per 100, \$38.00 per 1000

Growing Pointers

1. Have a loamy, organic soil for planting.
2. Have your Pansy bed elevated at least 3 inches.
3. Unpack the Pansies immediately upon receipt of shipment.
4. Water plants after planting; then water only when soil is dry.
5. Pinch the fading flowers to stimulate flower growth.
6. In warm weather, be on the lookout for insects and disease.

BUTTERFLY HYBRIDS

Butterfly Hybrids are a fine pastel-tinted Pansy mixture. You'll see tones of color hardly ever produced by man, but "Mother Nature" has used her magic touch to do just that. Lovely shades of pink, apricot, coral, orchid and lavender are just a few of the many you'll see.

Pastel colors blended with large ruffled flowers describe Butterfly Hybrids. You'll enjoy hearing your friends compliment you on your prize-winning Pansies. Remember, for the mixture with those soft metallic jewel tones, select Butterfly Hybrids grown by Pitzonka.

BUTTERFLY HYBRIDS are interesting because of their ruffy blooms in pastel tints.

NOTE: Several gardeners have found that Butterfly Hybrids are adaptable to warmer weather. This is important to southern gardeners.

Plants, \$2.50 for 25, \$4.00 for 50, \$6.50 per 100

We are not listing spring flowering bulbs in this catalog but are having a separate catalog printed in full color. Why not send for a copy? Pick out your choice varieties and use them to plant with Pansies. A splendid idea is to plant your bulbs first and then plant Pansies over them. A bed of solid color bulbs underplanted with harmonious colors of Pansies is most effective.

The Pansy-THE FLOWER WITH A MILLION USES

About 142 years ago, the first interest was shown by gardeners in the Pansy group. At that time, home gardeners began selecting and saving seed of the more desirable plants from the wild Violas.

The word "pensee" was first mentioned by a French writer named Jean Ruel around 1500. "Pensee" is the Latin term for Pansy, but they weren't the Pansies that we are accustomed to seeing. The Pansies that were enjoyed in those days were very similar to our own Johnny-Jump-Up of today. Through the years, many plantsmen and home gardeners carried on breeding experiments, and now we have such wonderful varieties as the Swiss and other extra large flowering kinds.

Experts in the gardening business all agree that Pansies and Violas are nicer when planted in the autumn or winter (depending upon location). Autumn planting produces Pansies with blooms that are gigantic in proportion. Pansies

make the perfect bedding flower because, when planted 6 inches apart, an appearance of a solid colorful carpet is obtained. The more blooms that are removed, the more flowers will be produced to keep your garden beautiful for months. Pansies blend well with azaleas, Virginia bluebells, narcissi, English daisies and tulips to extend the spring weeks of color.

Because of their size, Pansies are perfect companions in foundation plantings of evergreens and shrubs. Pansies definitely will put color galore around ordinarily lovely green foliage. Don't forget that Pansies and Violas will add a spark of spring beauty to rock gardens and perennial borders.

Flower arrangements take on a special colorful air if either Pansy or Viola blooms are included. Most varieties of Pitzonka's Pansies are scented with a heavenly light spicy fragrance.

Plan on getting the most from your garden. Select Pansies and Perennials from Pitzonka today. You'll be glad you did!!

Special Green Thumb News

For our friends who desire to grow Pansies, Violas, English Daisies, and Forget-Me-Nots from seed, here is your opportunity.

Mr. Pitzonka has prepared a list of seed varieties that he thinks you will enjoy. The named varieties are as pure as can possibly be grown, and massive flower size is another feature he has combined into practically all of them. In seed production, we are constantly roguing the poorer or weaker plants. What is left is only the finest seed-producing plants possible.

The seed is picked during May and June and is placed on large drying boards in the warm sun. As soon as the seed is matured and dry, it is cleaned and stored in closets. You can select the varieties that suit your color scheme. With each order, we send you a handy pamphlet on growing Pansies from seed. By following our instructions, you should achieve success. Our regular seed packet is usually enough for the home gardener, although, to be sure of success, the double packet is the wiser buy.

Good plants can come only from good seed—Pitzonka's seed.

When you sow seeds in your garden, what do you use to prepare the soil? Organic fertilizer such as rotted cow manure is excellent as an over-all fertilizer. The soil should be of a light, loamy nature, properly drained. A way to change the soil is to add sand for good drainage and peat moss for lightness. Besides good soil, the best seed is required for maximum results. The BEST seed is Pitzonka's quality seed.

THE IDEAL BEDDING VARIETY

Pitzonka's PRIZE MIXTURE *Pansy* Plants

As economical as can be imagined—that describes Pitzonka's Prize Mixture. Yes, economical enough to use as mass plantings around evergreens or in the spring bulb garden. Besides being inexpensive, the range of colors is breath-taking, including almost every shade and color possible. Some of the blooms are pure colors with no markings, while others have pencil stripings or blotches. The blossoms are smaller than our other mixtures but are borne more profusely, making Prize Mixture the natural for bedding.

The formula for this mixture was developed by Mr.

Pitzonka. The plants in the seed beds are being constantly rogued so as to discard any and all weak or off-color Pansies.

Get your Pitzonka's Prize Mixture today and have your plants well established by next spring. Try working them into a garden where tulips or jonquils have been the mainstay in past springs. Another suggestion is to plant Pitzonka's Prize Mixture along with Virginia Bluebells (*Mertensia virginica*). Try to work out your own garden plan, using Pansies as inexpensive bedding plants. It's fun!

Regular size plants, \$3.00 per 100, \$20.00 per 1000, 5000 or more at \$18.00 per 1000.

Our Garden Mart also has a wide selection of trees, shrubs and evergreens (cash and carry sales only), suitable for all types of homes. See you at the Garden Mart.

MINIATURE PANSIES

From early Elizabethans come these lovable miniature Pansies . . . a novelty in their gardens, but a true integral part of our everyday flower bed.

Why the general increase of interest in miniature Pansies? Gardeners have found that Violas will continue their prolific blooming all the way through the warm season. Flowers are borne in great profusion, giving much more color to those drab, difficult areas. Their merry flower faces give a feeling of informality and carefreeness to every garden—a wonderful feature indeed.

Violas have many times more uses than other plants

ADMIRATION. Beautiful deep violet.

BLUE PERFECTION. A well-formed flower of medium blue with a yellow eye. Very free blooming.

JOHNNY-JUMP-UP. A small-flowering type. Various combinations of purple, blue and yellow. Colorful all summer.

LUTEA SPLENDENS. Rich golden yellow. Excellent with blue varieties.

WHITE PERFECTION. Clear frosty white. One of the most desirable.

or shrubs. When clumps of Violas are placed in the rockery, a "face lifting" of color takes place. Early spring color of rock gardens is intensified by miniature Pansies. Many gardeners utilize Violas as ground covers around shrubby plantings—an effective but economical habit.

Pitzonka's Violas are of the highest quality in purity and uniformity. Delicate colors are found in our named varieties and a marvelous array of tones in Pitzonka's Viola Bedding Mixture. Start this year by rejuvenating your garden with Pitzonka's Miniature Pansies.

ARKWRIGHT RUBY. Bright rosy crimson with terra-cotta shadings. Very fragrant.

CHANTREYLAND. Lovely rounded flowers of rich apricot color, the center sprinkled as if with brick dust. Profuse flowering; spicily fragrant.

KING HENRY. A small-flowering type. Purple with a lighter center and dark stripes. The chrome-yellow eye provides a nice contrast. Compact and very free flowering.

Any of the above:

**\$1.50 for 25, \$4.50 per 100, \$36.00 per 1000
250 plants or more of one color at the 1000 rate**

Benefit from our years of experience, and plant Violas and Pansies this fall. Fall planting allows the plants to become established before hard freezes arrive. Flowers will appear earlier next spring, and your Pansy plants will be stockier.

STUDY THESE PICTURES

These pictures, though much reduced in size, show the difference between our Large and Regular size Pansy plants. The Large ones are older and will bloom more quickly, but the Regular size are produced under the same conditions and will give fine flowers when fully grown.

SIMPLE SUGGESTIONS FOR GROWING PANSIES

1. Choose a well-drained, sunny location (part shade is no obstacle).
2. Any good garden soil will do. Soil must be rich and can be made so by mixing plenty of well-rotted cow manure, sheep manure or rotted compost and an application of commercial fertilizer with an analysis of 5-10-5 through the soil. If possible, allow the bed to stand a few days to several weeks before planting.
3. When the plants are received, pulverize the soil to a depth of 6 inches. Set the plants about 6 inches apart, as deep as they were in the nursery. Water well; shade in midday until well rooted.
4. After the ground is frozen hard, mulch lightly with hay or straw.
5. A requirement is to have the soil rich. Give another application of commercial fertilizer, according to directions, when growing weather starts in the spring.

Directions to Customers

ORDERING

We aim to execute orders as soon as received, but in the rush season slight delays are unavoidable, and when such is the case an acknowledgment will be sent at once. If you order early and give a shipping date, we will be pleased to ship so that the orders reach their destination on or about the date specified. When no shipping instructions are given, orders are filled in the rotation in which they are received.

TERMS

Those desiring to open accounts will please furnish references from three parties with whom they have had credit relations and allow sufficient time for us to investigate; otherwise cash must accompany order.

Remittances should be made by Post Office Money Orders, Drafts on New York or Philadelphia banks, or Express Money Orders, in amount sufficient to cover the complete order. Where it is impossible to obtain these, the letter should be registered. We cannot guarantee receipt of money sent in any other way. We reserve the right to decline C.O.D. orders.

No charge is made for boxes or packing, *except on shipments sent Parcel Post prepaid*, and the additional cost for packing and postage on these is covered by the additional 10, 15 and 20 per cent as per table of rates.

In filling out your order, always give shipping directions, and write *Name and Address distinctly* on each and every order. Use back of this order blank.

SHIPPING

Plants should be set out at once when they are received, unless they are slightly withered. In that case, remove them from the box to a cool place. Wet the moss that was used for packing and lay it on the roots until they are revived. Never set out a withered plant.

GUARANTEE

We guarantee to dig, pack and ship good, clean, thrifty, well-grown plants in good growing condition. Failure may result from improper planting, lack of moisture, frosts, floods, over-fertilization, etc., and we cannot guarantee continued growth after stock is planted on customer's premises because this is entirely beyond our control. Claims, if any, for shortages or damages must be made within five (5) days after arrival.

HOW WE SHIP
